

## THE "BLOOMFIELD" SKELETON WHEEL

FOR PLOUGHING AND CULTIVATIONS ON HEAVY, MEDIUM OR LIGHT SOILS, WHEN RUBBER TYRES SLIP OR WEAR EXCESSIVELY: UNIQUE OPEN CENTRE DESIGN PREVENTS SINKING IN WHEN USING HEAVY MOUNTED PLOUGHS IN WET WEATHER

Special Angle Spuds wear at least twice as long as pneumatic tyres, and can be reconditioned as new for a little over half the cost of retreading rubber tyres

These wheels run clean even in very bad conditions saving fuel and increasing tractor performance by giving a non slip grip to match engine horsepower

*Available for:—*

Massey Ferguson '65'  
Massey Ferguson '35'  
Ferguson '20'  
Nuffield
